2nd France Asia Particle Physics School

In 2009, a new era of particle physics will start with the launching of LHC. This two-week pre-doctoral school aims at providing future PhD students and young physicists with theoretical and practical tools necessary to address the challenges of this experimental field in the next decade. This school, mainly oriented to Asian and French students, will allow building fruitful relationships, crucial to the future of particle physics.

Hunting for signals beyond the standard model
